OFFICE ACTION
Election/Restriction

1. Claims 1-13 are pending in this application.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- (I) Claims 1-5, drawn to a semiconductor package, classified in class 257, subclass 316;
(II) Claims 6-13, drawn to a method of manufacturing a semiconductor package, classified in class 438, subclass 238.

2. Inventions I and II are related as product made and process of making. The inventions are distinct if either or both of the following can be shown: (1) that the product as claimed can be made by another and materially different process or (2) that the process as claimed can be used to make other and materially different product (MPEP § 806.05(f)).

In this case: (Group I compared to Group II) the magnetoresistive random access memory comprising a vertical structure field effect transistor can be formed by not only the claimed method but also other semiconductor process/methods, and vise versa.

3. Applicant is advised that the reply to this requirement to be completed must include an election of the invention to be examined even though the requirement is traversed (37CFR 1.143).
